

Working session about the students projects

Discussion, feedbacks and debates, among mentors and partners, are required about 4 items

- **Goal and objectives of the projects** – are they achieved? Do students understand the exercise? If not, why?
- **Organization** – how students can work together remotely? What about the “Mondays”? How can we engage them with similar level of commitment? How can we help them to find good governance structure? Roles?
- **Mentoring process and general mentoring of the exercise** - How did it work with each group? What is needed from students? How mentoring and evaluation process are articulated?
- **Evaluation** – Who evaluate? Is the evaluation understood by students? What are the evaluation requirements in each university? How can we join more the institutional evaluation process together, and in relationship with the self-evaluation presented to students?
